EXPERIENCE

AI/ML & Python Software Engineering Intern

Sept-2025-Feb-2026

Applsip Technologies Pvt Ltd

- Developed Python-based **REST APIs** using FastAPI for a **hotel management SaaS**, supporting booking, customer, staff, restaurant, and billing workflows.
- Designed PostgreSQL databases and **optimized SQL queries** for transaction processing, reporting, and operational data management.
- Implemented **NLP-based customer feedback analysis** and sentiment classification to automate review analysis and business insights.
- Built backend services for invoice generation, email notifications, document-based registration, and analytics dashboards for booking, financial, and customer feedback reporting.

EDUCATION

Post Graduation Certificate Program (PGCP)-AI

CDAC-Delhi

Delhi

Feb 2026 – Aug 2026

Master of Computer Application (Data Science) - CGPA: 8.29/10

Ajeenkya DY Patil University

Pune, MH

2023 – 2025

Bachelors in Science (Computer Science) - CGPA: 8.62/10

Ashoka College for Business and Computer Studies

Nashik, MH

2020 – 2023

PROJECTS

Autonomous E-Commerce Operations Agent | Python, FastAPI, PostgreSQL, LangGraph, RAG | [@github](https://github.com)

- **Objective:** Built a multi-agent AI platform to automate e-commerce operations monitoring, SLA compliance, and executive reporting.
- Developed **10+agent LangGraph workflow** integrating FastAPI, PostgreSQL (1,000+ operational records across 6 tables), RAG, and Groq LLM.
- Implemented 6 analysis modules, **context-aware follow-up queries**, RAG over 3 policy documents (top-3 retrieval), and interactive KPI dashboards.
- **Impact:** Automated operational analysis by generating policy-aware insights, compliance evaluation, and executive ready reports through a unified dashboard.

DecisionPilot AI Business Analytics Assistant | Python, Pandas, NumPy, Plotly, LangGraph, Groq | [@github](https://github.com)

- **Objective:** Built an AI-powered business analytics assistant for automated analysis of uploaded CSV datasets.
- Developed an **end-to-end workflow** for profiling, statistical analysis, conversational querying, visualization, and PDF report generation.
- Implemented schema detection, missing value analysis, duplicate detection, statistical analysis, and **6+ interactive visualizations**.
- **Impact:** Eliminated manual business reporting by generating **executive-ready insights**, charts, and reports in a conversational interface.

SKILLS

Programming: Python, SQL

Data Analytics: Pandas, NumPy, Microsoft Excel, Power BI, Plotly, Data Cleaning, EDA

Databases: PostgreSQL, MySQL, SQLAlchemy, SQL Query Optimization

Backend & APIs: FastAPI, REST APIs, API Integration, Swagger/OpenAP

Machine Learning & AI: Scikit-learn, TensorFlow/Keras, PyTorch, NLP, Deep Learning, OpenCV

Generative AI: LangChain, LangGraph, RAG, ChromaDB, Groq API, AI Agents

Tools: Git, GitHub, Docker, Jupyter Notebook

Cloud & Concepts: AWS (Basic), ETL, Data Warehousing, SDLC
